WORK EXPERIENCE

Private Programs

04/2025 - Present

All findings disclosed responsibly.

Achievements

- Discovered & disclosed a **stored HTML injection** bug (04/25)
- Discovered & disclosed a **reflected XSS** bug (05/25)
- Discovered & disclosed a **stored HTML injection** bug (06/25)
- Discovered & disclosed a **chained stored HTML injection / CSRF** bug (06/25)

HackerOne

03/2025 - Present

Achievements

<https://hackerone.com/greasysweet>

- Discovered a publicly accessible S3 bucket leaking sensitive user data. While marked as a duplicate, the finding validated my ability to identify real-world cloud misconfigurations.
- Placeholder.

PERSONAL PROJECTS

ProjectDisclosed (InProgress)

A program to help find interesting endpoints and information.

- <https://github.com/GreasySweet>

Private Tooling (Ongoing)

Alightweight Bash and Python scripts that chain tools like gau, ffuf, nuclei, and httpx to automate subdomain discovery, endpoint extraction, JavaScript analysis, and vulnerability pattern detection. Designed for speed, modularity, and use in live bug bounty workflows.

- <https://github.com/GreasySweet>

EDUCATION

Self-Taught Cybersecurity Researcher

Ongoing | Independent Study & Practice

02/2025 - Present

- Programming with Python, Go & PHP
- Practice via labs during downtime, focusing on practical offensive techniques
- Preparing for the Junior Penetration Tester (eJPT) certification
- Hands-on experience through bug bounty platforms, responsible disclosure, and custom tooling

SKILLS

Assessment Methodologies

AWS

Python

Web Application Penetration Testing

Linux

Host & Networking Penetration Testing

Bash

Host & Networking Auditing

API Penetration Testing

Cloud Penetration Testing

Windows Server

Automation

ACHIEVEMENTS & AWARDS

FirstPaidBounty-PrivateProgram(04/2025)

Received a monetary reward for a valid vulnerability report within just two months of starting bug bounty hunting.

Recognized for High-Quality Reports in Private Program (2025)

Received positive feedback from triage teams for clear and reproducible reports, with multiple vulnerabilities marked as valid without follow-up questions..

Chained Stored HTML Injection into Phishing-Style CSRF Attack (2025)

Reported a vulnerability that combined stored HTML injection with CSRF to simulate a fake login/register flow — demonstrating creative exploit chaining and real-world impact.

Built a Personal Recon Automation Toolkit (2025)

Designed a modular Bash and Python-based toolkit that automates subdomain discovery, JS analysis, and endpoint extraction — now used in all personal bug bounty workflows.

Recognition from Multiple Companies (2025)

Silvergoldbull, Vintage Story, and more.

CERTIFICATES

JuniorPenetrationTester (IN PROGRESS)

Certificate ID: TBD
